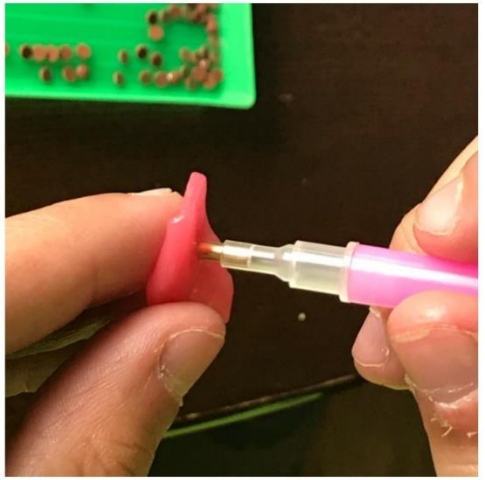
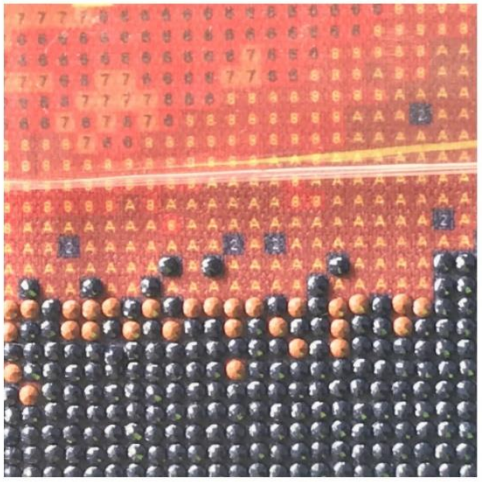
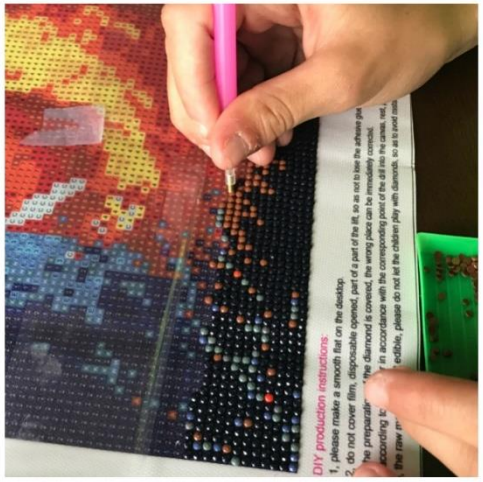
product name
Rugby
number
0252







DIY production instructions:
1. please make a smooth flat on the desktop

osable opened, part of a part of the lift, so as not to lose th
diamond is covered, the wrong place can be immediately
n accordance with the corresponding point of the dri
edible, please do not let the children play with dia

5D Diamond Painting

1. Remove all items from the package. You can arrange your tools and diamonds however is easiest for you since everyone will have their own process.
2. Lay out the canvas on a clean, flat surface.
3. Choose a single color diamond to start “painting” with. Each color corresponds to a color shown on the chart – similar to painting or coloring by numbers.
4. A tray is included to give you easy access to the color diamond you are working on. Place the diamonds in the included grooved tray for picking up easily.
5. Dip the tip of the applicator in the wax/adhesive since this will help you to pick up the diamonds. Tweezers have also been included if this is easier to use. Note: Use the wax/adhesive frugally.
6. Press the tip of the applicator tool on the rounded side of the diamond.
7. Peel back the plastic film and carefully press the diamond onto its corresponding symbol. It’s recommended to only peel back the plastic film on the area you are immediately working on.
8. Repeat the process with all of the colors until your painting is complete. Once complete, you can frame the painting.
9. When you need to stop “painting”, reapply the plastic film to your work completed and press the diamonds into place.
10. When storing your canvas, do not bend – it’s best to keep the canvas flat once the canvas has diamonds applied.
11. Remember to always keep small or sharp objects away from young children.

If you would like to purchase more diamond paintings, if you need more information, or if you need to print more instructions. visit us at www.FourBusyBees.com (part of www.DashingDigits.com). If you have any problems at all, please send us an email to info@dashingdigits.com. Enjoy!
